Quick Set-up Guide

PLEASE READ BEFORE COMMENCING ANY OPERATION. AFTER THE REMOVAL OF ALL THE PACKAGING, CAREFULLY OPEN AND CHECK THE CONTENTS.

HTB 1840 & TTB1840G CONTENTS

- Owner Manual
- Battery Charger & Lead
- Battery Pack
- Scrub Brush
- Squeegee Assembly

Using the handle position lever, (Fig.1) move the handle into the upright position, (Fig.2)

Slide the brush / pad under the brush deck (Fig.3).

Fit the brush / pad onto the Nulock drive chuck, twist to lock the brush / pad in place (Fig.4).

Swing the floor-tool carrier from behind the brush. Using the two locking knobs fitted to the floor-tool, secure to the floor-tool to the floor-tool carrier (Fig.5).

Fit the battery to the machine (Fig.6) and plug in the power supply (Fig.7). Ensure the battery has been charged before use.

Fill the clean-water to a Max of 18 litres
Machine Set-up Guide

Fitting the Brush / Pad / Turn on water

400mm Brush / 360mm Pad.
Featuring the Nulock brush system.
The brush is simply pushed and twisted to lock, making fitting and removal a simple process.
Slide the brush / pad under the brush deck.
Fit the brush / pad onto the Nulock drive chuck, twist to lock the brush / pad in place.
Safety gloves are recommended for the changing of used brushes.
Turn on the clean water tap.

Fitting the Floor Tool

The floor tool has been designed for quick fitting, allowing easy squeegee blade replacement and a safety knock-off feature if the floor tool gets snagged, whilst in transit.

NOTE: It is easier to fit the floor tool if the weight of the machine is resting on the brush. Ensure the brush is fitted first.

Swing the floor-tool carrier to the side of the machine. (Fig.1).
Secure to the carrier using the two knobs fitted to the floor-tool carrier (Fig.2) - (Fig.3).
Do not over tighten the retaining knobs.
Ensure inspection cap is in place on the fluid pipe. (Fig.4) - (Fig.5)
For fitting the floor tool blades (See Page 10).
**Filling the Clean Water Tank**
The HTB 1840 & TTB 1840 is equipped with a large 18 litre clean-water tank allowing large areas to be cleaned in a single fill.

To fill the clean-water tank, remove the filler cap (Fig.1). Fill using a hose, bucket or a suitable container (Fig.2). Use the fill indicator (Fig.3).

**NOTE:** Great care must be taken to ensure that contaminants (leaves, hair, dirt, etc.) are not allowed to enter the clean water tank during the filling process. If using a bucket or similar, ensure it is always clean and free from debris.

---

**Fill Level Indicator**
The HTB 1840 & TTB 1840 is equipped with a large 18 litre clean-water tank allowing large areas to be cleaned in a single fill.

Located on the left of the machine is the On / Off water tap (Fig.1). Ideally set the tap to 45° this enables the cleaning solution to last the same time as a fully-charged battery (Fig.2).
Setting the cleaning controls

To activate the control panel: press the Mode select button or press a trigger (Fig.A).

To start: hold down either Trigger and press the On / Off Switch once (Fig.A).

Whilst the brush motor is running press the water flow On / Off Button for fluid control (Fig.C), the clean water On / Off tap must be open.

Ideally set the tap to 450 (Fig.B) this enables the cleaning solution to last the same time as a fully-charged battery.

When the Triggers are released the brush motor and the cleaning solution pump will switch off, the vacuum motor will continue for 10 seconds.

Press the mode select button to operate the brush only (Fig.D).

The start sequence is required in this mode. The water flow On / Off button will operate in this mode.

Press the mode select button again to get vacuum only. The On / Off Switch and triggers are not required in this mode. (Fig.E)

Press the mode select button to switch this mode off and return to default mode.

The panel if unused will automatically turn off after 60 seconds.

Brush Overload

The brush motor will cut out and the brush load light will flash if the brush motor has been overloaded (Fig.F).

Releasing the handle triggers will allow the machine to reset.

IMPORTANT

If the brush motor keeps overloading consider using a different type of brush. Heavy brush load decreases the available battery run time.
Raising/Lowering the Floor Tool
To raise the floor-tool, ensure the floor-tool carrier is central to the machine. Lift the lever near the base of the handle and lock into position.

Emptying Top Tank
After use, empty waste-water tank using emptying hose and flush-out with clean water. (fig.A).

Emptying Bottom Tank
The clean-water tank can be drained via the yellow cap fitted to the left hand side of the machine. There is a sealing bung beneath the yellow cap (ensure the sealing bung is clean) The cap should only be done up by hand. (fig.B).

WHEN HANDLING AND MIXING CHEMICALS
Always ensure that chemical manufacturer’s safety guidelines are followed. Only use chemicals recommended for use in auto scrubber-dryers.

IMPORTANT
Do not operate machine unless the Operator Manual has been read and fully understood.

Machine In Use
To operate, set water flow rate tap, lower the floor tool, press the vacuum / water switches, pull brush On/Off trigger.

The waste water is then retrieved by the suction floor tool. Overlap each scrubbing path by 10cm to ensure an even clean. Do not operate the machine on inclines that exceed (2%), when full.

On heavily soiled floors use a ‘double scrub’ technique. First pre-scrub the floor with the floor tool in the raised position, allow the chemical time to work then scrub the area a second time with the floor tool lowered.

If streaking occurs wipe floor tool blades clean.

NOTE: Care must be taken to reduce speed when cornering or when manoeuvring around obstacles.
Regular Maintenance

Always ensure that the battery is disconnected prior to any maintenance operation!

Separator
Remove the two hoses to disconnect the separator from the machine (Fig. 1 & 2).
Remove fixing band holding separator in place (Fig. 3).
Lift off the separator. The separator has a sealing-rubber which should be examined at every clean-down (Fig. 4).

Rinse using clean water.

Emptying Top Tank
After use, empty waste-water tank using emptying hose and flush-out with clean water. (fig. A).

Emptying Bottom Tank
The clean-water tank can be drained via the yellow cap fitted to the left hand side of the machine. There is a sealing bung beneath the yellow cap (ensure the sealing bung is clean) The cap should only be done up by hand. (fig. B).

Remove the two filters clipped into the separator and flush with clean water (Fig. A & B).
Replace by fitting the rear of the filter first then clipping the front to lock in place.
Changing the Floor Tool Blades

Always ensure that the machine is switched off prior to any maintenance.

To change the floor-tool, firstly swing the floor-tool clear of the machine. Undo the two floor-tool retaining knobs (Fig. A).

Pull the floor-tool away from the machine (Fig. B).

1. Retaining knobs x 4
2. Front blade (slotted)
3. Blade carrier
4. Rear blade
5. Floor tool main body

NOTE: The blades are designed to be reversible, thus extending their useful working life.

Unscrew the four knobs securing the blade holder (Fig. 1).

Remove the blade holder (Fig. 2).

Replace the Squeegee blades using (903531) replacement blade set (Fig. 3), fitting the blades on to the moulded location lugs.

Refitting the Floor Tool Blades

Refit the blade holder, retain using the two outer knobs.
Ensure the slotted blade goes to the front of the floor-tool.

Note: The blades are designed to be reversible, thus extending their useful working life.
Refit the floor-tool using the two central knobs to the floor-tool.
**Regular Maintenance**

**Removing The Battery**

Unplug the battery from the machine using the red connection handle (Fig.A & B). The battery can then be lifted from the machine for storage or charging (Fig.C).

**Removing The Battery Pack Fuse**

The battery pack comes fitted with a 40 amp safety fuse. Replace the fuse using (208526) Numatic approved part.

**Battery Charging**

Recharge the machine fully after its last use. Do not leave the machine in a discharged state.

Under abnormal use; i.e. leaving the machine without charging for a period of time, we advise that you disconnect the battery from the machine. If the machine will be standing unused for a period of 30 days or more, then batteries must be fully charged.

**Note:** Batteries should be recharged every three months. Charge fully the day before you start using the machine again.

Under normal daily usage: Recharge batteries after each use regardless of machine operation time. Connect the charger unit to the battery and plug the charger into a suitable power supply.

</tbody>
</table>

The battery charge level meter displays the charge level of the batteries; when fully charged, all meter lights are illuminated. As the machine is used and the batteries are discharged, the Battery charge level meter lights will go out from top to bottom. If the battery charge level is allowed to discharge to the point that only one red light remains illuminated, the operator should charge the battery.

The battery supplied for this machine allows for a run time of 45 mins approx (Hi Mode), when fully charged. The battery pack must be fully discharged and recharged over a few cycles and brushes need to be worn in to achieve maximum efficiency.

Charge time for a fully discharged battery, is approximately 6 hours. The HTB 1840 & TTB 1840 come with its own stand-alone charger. Connect the charger to a suitable power supply.

Once mains power is connected the red charging indicator will illuminate. To ensure a full charge, the battery should be left for a period of 6 hrs. Once fully charged, disconnect the charger from the power supply and the charger lead from battery.

**Note:** Your charger will need resetting between subsequent battery charging, remove the charger from AC power supply to reset.

**WEEE (Waste, Electrical and Electronic Equipment)**

Scrubber dryer Accessories and packaging should be sorted for environmentally-friendly recycling. Only for EU countries. Do not dispose of scrubber-dryer into household waste. According to the European Directive 2002/96/EC on waste electrical electronic equipment and its incorporation into national law. Scrubber-dryers that are no longer suitable for use must be separated, collected and sent for recovery in an environmentally-friendly manner.

**PPE (Personal protective equipment) that may be required for certain operations.**

**Safety Critical Component:**

Charging Leads: H05VV-F x 1.0 mm² x 3 Core
Battery Charger: 220 / 240 Volt

**In the event of a breakdown contact your Numatic dealer or the Numatic Technical help line +44 (0)1460 269268**
As with all electrical equipment care and attention must be exercised at all times during its use, in addition to ensuring that routine and preventative maintenance is carried out periodically in order to ensure its safe operation.

Failure to carry out maintenance as necessary, including the replacement of parts to the correct standard could render this equipment unsafe and the manufacturer can accept no responsibility or liability in this respect.

When ordering spare parts always quote the Model Number / Serial Number specified on the Rating Plate.

When detergents or other liquids are used, read the manufacturer’s instructions.

Only use brushes provided with the appliance or those specified in the instruction manual.

It is essential that this equipment is correctly assembled and operated in accordance with current safety regulations.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance.

Operators shall be adequately instructed as to the correct use of the machine.

NOTES: This machine is also suitable for commercial use, for example in hotels, schools, hospitals, factories, shops and offices for other than normal housekeeping purposes.

This machine is not suitable for picking-up hazardous dust.

Do not use on surfaces having a gradient exceeding that marked on the appliance.

The machine is not to be stored outdoors in wet conditions.

This machine is for indoor use only.

Read the instruction manual before using the appliance.

This product meets the requirements of IEC 60335-2-72

- Ensure only competent persons unpack/assemble the machine.
- Keep your machine clean.
- Keep your brushes in good condition.
- Replace any worn or damaged parts immediately.
- Regularly examine the power cord for damage, such as cracking or ageing. If damage is found, replace the cord before further use.
- Only replace the power cord with the correct Numatic approved replacement parts.
- Ensure that the work area is clear of obstructions and / or people.
- Ensure that the working area is well illuminated.
- Pre-sweep the area to be cleaned.

- Use steam cleaners or pressure washers to clean the machine or use in the rain.
- Attempt machine maintenance or cleaning unless the power plug has been removed from the supply outlet.
- Allow any inexperienced repairs. Call the experts.
- Strain cable or try to unplug by pulling on cable.
- Leave the brush pad on the machine when not in use.
- Allow the machine to be used by inexperienced or unauthorised operators or without appropriate training.
- Use the machine without the solution tanks properly positioned on the machine, as shown in the instructions.
- Expect the machine to provide trouble-free, reliable operation unless maintained correctly.
- Run the machine over power cable during operation.
- Lift or pull the machine by any of the operating triggers, use the main handle.
- Remove the handle from the machine except for service and repair.

WARNING

This machine is not suitable for picking-up hazardous dust.

Do not use on slopes exceeding 2%.

CAUTION

In order to prevent unauthorised use of the machine the power key must be removed after use.

 operators shall be adequately instructed as to the correct use of the machine.

If this product does not have a factory installed Numatic battery charger, then it is the responsibility of the owner and user of the product to ensure that the charging system and battery combination are compatible, fit for purpose and safe to use.
Precautions when working with batteries
1. Always wear protective clothing e.g. face visor, gloves and overalls when working with batteries.
2. Whenever possible always use a properly designated and well-ventilated area for charging.
   Do not smoke or bring naked flames into the charging area.
3. Remove any metallic items from hands, wrists and neck i.e. rings, chains etc. before working on a battery.
4. Never rest tools or metallic objects on top of the battery.
5. When charging is complete disconnect from the mains supply.
6. The batteries must be removed from the machine before it is scrapped.
7. The machine must be disconnected from the supply when removing the battery.
8. To remove the batteries:- Disconnect machine from the mains supply (if charging) and ensure batteries are switched off with circuit disconnect switch (see page 19). Disconnect hoses from separator and tanks.
   Remove separator and tanks. Unscrew battery strap fixings and remove.
   Undo battery terminals and remove. Remove batteries.
9. The batteries are to be disposed of safely and in accordance with the battery directive.
10. Only use genuine Numatic replacement batteries.
11. Do not allow the batteries to become fully discharged; it may not be possible to re-charge them.
   Batteries should not be discharged below 9.5 volts with 10 amps flowing.
12. Do not allow one battery to be discharged separately to the other.
13. Do not mix batteries from different machines.
14. The batteries fitted to this product are Valve Regulated Lead Acid (VRLA) gel electrolyte type.
   The fitting of any other type of battery may cause a safety hazard.

Battery Care

1. Battery Storage:
   a. Batteries must be stored in a dry, level and clean location not exceeding a temperature range of 5°C to 25°C.
   b. Batteries must be fully charged after 6 months when on-the-shelf and as a minimum every 3 months thereafter or if the battery voltage reduces to 12.6V.
   c. Batteries must be put into use within 12 months of the date of manufacture, failure to do so will lead to reduced capacity in the field.
      (battery date code) - silver label on the battery - (e.g. 1649) = Year - 2016 / Week - 49.
   d. If a battery reaches 10.5V, irreversible damage has occurred. Under this condition, a battery should not enter into service and should be disposed of according to local authority guidelines.

2. During Use:
   a. Batteries must be recharged after every use regardless of machine run time
   b. If the machine is to be left dormant for any length of time complete the following:
      i. Fully charge the batteries and remove the battery fuses
      ii. Every 3 months insert the fuses and recharge
      iii. Do not leave batteries dormant for more than 6 months

3. Warranty:
   a. Batteries are warranted for 600 cycles (2 Years) providing all battery care rules are followed
   b. To claim warranty the following details must be supplied
      i. Serial number of the machine
      ii. Battery date code (Show picture of battery date code)
      iii. Date purchased
      iv. Proof of Purchase
      v. Maintenance history and charging regime

Daily
Keep the machine clean.
Ensure brushes/ pads/ squeegee/ filters are in good condition.
Check for any worn or damaged parts and replace immediately.
Drain and rinse dirty water tank after every use.
Store machine with brush deck secured in tilted position.

Weekly – as daily and –
Check brush or pad and skirt and rinse.
Check floor tool blades for wear and wipe clean.
Clean separator assembly including filter and check condition of seal.
Flush out system with clean water and clean filters.
Do not steam clean or pressure wash.

Batteries
Always re-charge the batteries after use.
Charge for a minimum of 4 hours after the green light has come on, this will prolong battery life.

EU Declaration of Conformity

EU DECLARATION OF CONFORMITY

We hereby declare under our sole responsibility that the following equipment fulfils all the relevant provisions of the following EU Directives:

Machinery Directive 2006/42/EC
EMC Directive 2014/30/EU
RoHS Directive 2011/65/EU

Machine Description: Scrubber Dryer
Machine Type: TTB1840, HTB1840 Series.

Relevant standards upon which conformity is declared include:

EN 60335-2-72: 2012
EN 62233: 2008

Warranty

Numatic International Limited warrant to the original purchaser that its products are free of defects in both material or workmanship for the period shown below:-

- Homecare and Cleancare Vacuum cleaners.......................................................... 2 Years
- Rotary Floor Machines......................................................................................... 2 Years
- Twintec Auto Scrubber Dryer................................................................................ 1 Year
- Vario Ride-On Scrubber Dryer.............................................................................. 1 Year
- Mopping, Compacts, Combi and Servocare Products............................................ 1 Year
- Individual Accessories and Spare Parts.............................................................. 6 Months

Note: This warranty expressly excludes consumable parts such as carbon brushes, floor brushes, mops, batteries etc, that are considered replaceable from time to time during the normal working life of the machine.

A. The warranty period commences from the date the goods are purchased.

B. All warranty claims must be processed through the Dealer from whom the equipment was purchased. The Dealer will co-operate with the purchaser throughout the warranty claims procedure and will arrange any necessary repairs using genuine Numatic parts.

C. If the original Dealer is no longer able to fulfil his obligations please contact Numatic International Limited with full details of the claim and proof of purchase so that this may be processed without delay.

D. Any warranty claim can only relate to the specific part that is proven to be at fault and for which a replacement will be supplied but cannot be extended to constitute a claim against the complete machine.

E. Numatic International will supply the Dealer with any warranty parts required, subject to the claim being validated, after return of the faulty items in accordance with Numatic International Limited’s General Conditions of Sale.

F. Claims will not be accepted if they are the result of fair wear and tear, misuse or abuse of any kind.

G. No replacement will be given unless the appropriate evidence of the validity of the claim has been provided to the satisfaction of Numatic International Limited.

H. Numatic International Limited reserve the right to charge for any unnecessary work carried out as a result of an invalid claim.

I. No variation to this warranty may be made or implied by any member of Numatic International Limited or its Dealers unless such variation is in writing and authorised by the Company.
