

STRAIGHT DIE GRINDER MODEL NO: CAT36B, CAT89 & CAT98

PART NO: 3110436, 3110845 & 3110854

OPERATING & MAINTENANCE INSTRUCTIONS

GC0315

INTRODUCTION

Thank you for purchasing this CLARKE Air Tool.

Before attempting to use this product, please read this manual thoroughly and follow the instructions carefully. In doing so you will ensure the safety of yourself and that of others around you, and you can look forward to your purchase giving you long and satisfactory service.

GUARANTEE

This product is guaranteed against faulty manufacture for a period of 12 months from the date of purchase. Please keep your receipt which will be required as proof of purchase.

This guarantee is invalid if the product is found to have been abused or tampered with in any way, or not used for the purpose for which it was intended.

Faulty goods should be returned to their place of purchase, no product can be returned to us without prior permission. This guarantee does not effect your statutory rights.

GENERAL SAFETY RULES

CAUTION: FAILURE TO FOLLOW THESE PRECAUTIONS COULD RESULT IN PERSONAL INJURY, AND/OR DAMAGE TO PROPERTY.

WORK ENVIRONMENT

- 1. Keep the work area clean and tidy.
- 2. Dress appropriately Do not wear loose clothing or jewellery. Tie long hair out of the way.
- 3. Keep children and visitors away Do not let children handle the tool.

USE OF POWER TOOLS

- 1. Stay alert and use common sense do not operate this tool when you are tired or under the influence of alcohol, drugs or medication.
- 2. Always wear eye protectors when using air tools. Eye protectors must provide protection from flying particles from the front and the side.
- 3. Always wear ear protectors and a dust mask when using the air tool.
- 4. Do not overreach Keep proper footing and balance at all times.
- 5. Never use oxygen, CO2, combustible gasses, or any bottled gas, as a source of power for this tool. This product should only be used with a suitably rated compressed air supply.
- 6. Do not connect the air supply hose with your finger on the trigger.
- 7. Do not fit the tool to any stand or clamping device that may damage it.
- 8. Do not exceed the maximum pressure for the tool of 90 psi / 6.2 bar.
- 9. Keep the air supply hose away from heat, oil and sharp edges.
- 10. Check hoses for leaks or excessive wear before use, and ensure that all connections are secure.
- 11. Do not use the tool for any other purpose than described in this manual.
- 12. Do not carry out any alterations or modifications to the tool.
- 13. Always disconnect from the air supply when:
 - Performing any maintenance.
 - The tool is not in use.
 - The tool will be left unattended.

- Moving to another work area.
- Passing the tool to another person.
- 14. Never use the tool if it is defective or operating abnormally.
- 15. This tool should be serviced at regular intervals by qualified service personnel.
- 16. Avoid damaging the tool for example by applying excessive force.
- 17. Always maintain the tool with care. Keep it clean for the best and safest performance.
- 18. Quick change couplings should not be located at the tool. They add weight and could fail due to vibration.
- 19. Do not force or misuse the tool. It will do a better and safer job at the rate for which it was designed.
- 20. Do not remove any labels. Damaged labels should be replaced.
- 21. This tool vibrates with use. Vibration may be harmful to your hands or arms. Stop using the tool if discomfort, a tingling feeling or pain occurs. Seek medical advice before resuming use.

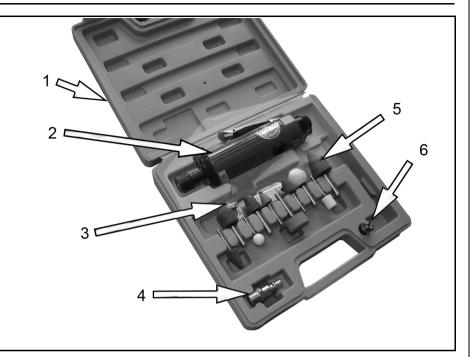

USE OF THE GRINDING TOOLS

- 1. Ensure that sparks and particles resulting from use do not create a hazard, Use screens where appropriate.
- 2. Never bump the grinding stones onto the workpiece, or let it hit any other objects while grinding.
- 3. Always allow the tool to run up to full operating speed before applying it to the job.
- 4. Use clamps, or vices to hold the workpiece. Failure to secure the workpiece could result in personal injury.

TRANSPORTATION & STORAGE

- 1. Never carry an air tool by the air supply hose.
- 2. Never carry an air tool with your finger on the trigger.
- 3. When not in use, the tool must be disconnected from the air supply and stored in a dry place out of the reach of children (preferably in a locked cabinet).
- 4. Avoid storing in cold environments.

OVERVIEW

NO	DESCRIPTION	NO	DESCRIPTION
1	Moulded Storage Case (CAT36)	4	Male Snap Connector
2	CAT89 Die Grinder	5	10 Grinding Stones (CAT36B only)
3	2 x Collet Wrenches	6	2 x Collets (1 already fitted to tool)

The CAT89 Die Grinderis identical to the CAT98 other than in the body style.

The CAT36B Die Grinder KIt includes a CAT89 Die Grinder together with the accessories shown.

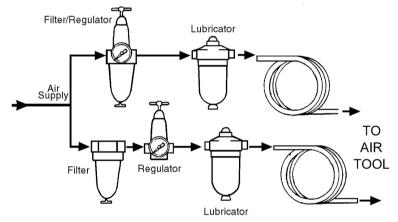

When opening the case for the first time, check against the following list that all the items are present. Any damage or deficiency should be reported to your CLARKE dealer immediatey.

COMPRESSED AIR REQUIREMENTS

WARNING: COMPRESSED AIR CAN BE DANGEROUS. ENSURE THAT YOU ARE FAMILIAR WITH ALL PRECAUTIONS RELATING TO THE USE OF COMPRESSORS AND A COMPRESSED AIR SUPPLY.

- Use only clean, dry, regulated compressed air as a power source.
- Air compressors used with the tool must comply with the appropriate European Community Safety Directives.
- A build-up of moisture or oil in the air compressor will accelerate wear and corrosion in the tool. ensure any moisture is drained from the compressor daily and the inlet filter is kept clean.
- If an unusually long air hose is required, (over 8 metres), the line pressure or the hose inside diameter may need to be increased.
- The air hose must be rated at least 150% of the maximum operating pressure of the tool.

- A typical air line layout is shown above. If an automatic in-line filter/ regulator is used, it will keep the tool in good condition, but should be regularly checked & topped up with oil. Clarke air-line oil should be used, and the lubricator adjusted to approx 2 drops per minute.
- Never exceed the maximum operating pressure for the tool. It is recommended that air pressure to this tool does not exceed 90 psi at the tool when running. Higher pressures and unclean air will shorten the life of the tool due to faster wear and is a possible safety hazard.

BEFORE USE

WARNING: COMPRESSED AIR CAN BE DANGEROUS. ENSURE THAT YOU ARE FAMILIAR WITH ALL PRECAUTIONS RELATING TO THE USE OF AIR COMPRESSORS AND COMPRESSED AIR SUPPLY.

NOTE: Ensure the compressor is turned off.

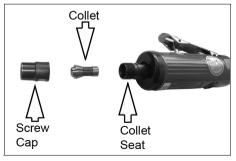

- 1. If required, connect an in-line mini oiler to the tool.
 - A mini oiler helps to prolong the life of the air tool.
- 2. If a mini-oiler is not being used, run a few drops of oil through the tool before use. It can be entered through the inlet connector or via the hose at the nearest connection to the air supply.
- 3. Connect a suitable hose as shown.
- 4. Connect the other end of the hose to the compressor.
- 5. Turn on the air supply and check for air leaks. Rectify any found before proceeding.
 - PTFE tape may be helpful for sealing threaded connections.
- 6. Your air tool is now ready for use.

You can fit a whip hose with a quick fit coupling if required (available from your Clarke dealer).

INSTALLING THE COLLET

- 1. Select the grinding stone you require.
- 2. Three collets of different sizes are provided. Select whichever fits the shank of the stone you have chosen.
 - The larger collet is probably already installed in the grinder.
- 3. If a different collet is to be used, undo the screw cap completely and pull out the collet from the collet seat. Replace it with the

new collet and screw the cap loosely back on.

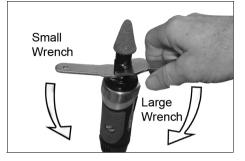

FITTING THE GRINDING STONE

IMPORTANT: Never use chipped or cracked grindstones.

- Slip the shank of the chosen stone into the collet and tighten the screw cap finger tight.
- 2. Place one wrench over the collet seat to stop the tool from rotating.
- 3. Use the other wrench to fully tighten the collet and grip the stone in position as shown.

OPERATING THE DIE GRINDER

- 1. Use your thumb to slide the throttle locking lever forward while squeezing the trigger against the body of the tool.
- 2. Do not use excess pressure on the grinding stone as this will shorten its life.
- 3. Release the trigger to stop the grinder.

• The tool will continue to rotate very briefly after the trigger has been released.

Always ensure the grinder has stopped before putting it down.

SETTING THE SPEED

1. Adjust the tool speed by setting the air regulator on top of the tool body using a suitable screwdriver.

DISCONNECTING THE AIR SUPPLY

1. Do not disconnect the air supply hose until the compressor has been shut down and the compressed air released.

- 2. Refer to the compressor instruction manual for the procedure to shut down and release the compressed air.
- 3. Once the pressure has been released, disconnect the air supply hose from the tool.

STORAGE

If the tool is to be stored, or is idle for longer than 24 hours, run a few drops of Clarke air line oil into the air inlet, and run the tool for 5 seconds in order to lubricate the internal parts.

When not in use, disconnect from air supply, clean tool and store in a safe, dry place. When storing, ensure the blanking plug is replaced on the airline connector once the airline is disconnected.

TROUBLESHOOTING

SYMPTOM	PROBLEM	SOLUTION
Tool runs at normal speed but slows down under any load.	 Motor parts worn. Worn or sticking mechanism due to lack of lubricant. 	 Return to Clarke dealer for repair. Drip air tool lubricating oil into air inlet. Allow oil to soak moving parts before using.
Tool runs slowly. Air flows weakly from exhaust.	 Motor parts jammed with gum/dirt. Air-line regulator in closed position. General airflow blocked by dirt. 	 Examine inlet air filter for blockage. Drip a few drops of air tool lubricat- ing oil into air inlet. Adjust in-line regulator to open position. Operate tool in short bursts.
Tool will not run. Air flows freely from exhaust.	1. Motor vanes stuck due to buildup of foreign material.	 Disconnect air supply and rotate tool assembly manually. Try operating tool in short bursts. Tap motor housing gently with a rubber mallet. Drip a few drops of air tool lubricating oil into air inlet to soak moving parts.
Tool will not shut off.	1. Throttle O-rings damaged or ill-fitting in seat.	1. Return to Clarke dealer for repair.

MAINTENANCE

WARNING: MAKE SURE THAT THE AIR TOOL IS DISCONNECTED FROM THE AIR SUPPLY BEFORE STARTING ANY CLEANING, OR MAINTENANCE PROCEDURES.

DAILY

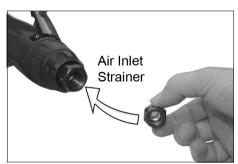

- 1. Before use, drain water from the air-line and compressor.
- Pour a few drops of CLARKE airline oil, into the air inlet. This should be carried out regardless of whether or not an in-line mini oiler is used. If an inline mini oiler is not used, this procedure should be repeated after every two to three hours of use.

WEEKLY

1. Check the air inlet strainer for blockage and clean if necessary.

CLEANING

- 1. Keep the body of the tool clean and free from debris.
- 2. Grit or gum deposits inside the tool may also reduce its efficiency. This condition can be corrected by cleaning out the air strainer and

flushing out the tool with gum solvent or oil, or failing this, the motor may require dismantling. This is better left to your Clarke dealer.

SERVICE AND REPAIR

1. If the tool runs erratically or becomes inefficient although the air supply is in good order, it may be necessary to dismantle the air motor and replace any worn or damaged parts. Such servicing and repair work should be carried out by a qualified service technician.

PERFORMANCE

Please note that factors other than the tool may effect its operation and efficiency such as reduced compressor output, excessive drain on the airline, moisture or restrictions in the air-line, or the use of connectors of improper size or poor condition which will reduce air supply.

**Clarke Air-Ine Oil (part no. 3050825) is available from your Clarke dealer.

Your Clarke air tool has been designed to give long and trouble free service. If, however, having followed the instructions in this booklet carefully, you encounter problems, take the unit to your local Clarke dealer.

STORAGE

If the tool is to be stored, or is idle for longer than 24 hours, run a few drops of Clarke air-line oil into the air inlet, and depress the trigger in order to lubricate the internal parts. When not in use, disconnect from air supply, clean and store in a safe, dry place.

ACCESSORIES

A wide range of airline accessories is available including filter/regulators, lubricators, high-pressure hoses (5 to 50 metres) etc.

Contact your Clarke dealer or Clarke International Service Department for further information.

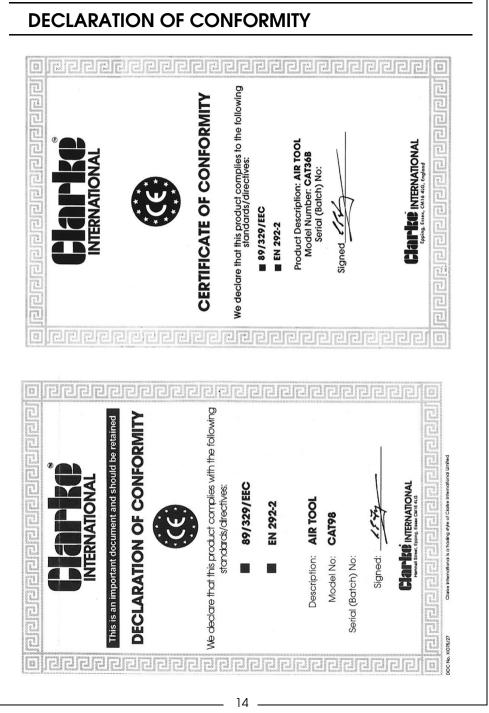

SPECIFICATIONS

Model Number	CAT36B, CAT89 & CAT98
Tool Weight	0.6 kg
Collet Capacity	1/8″ - 1/4″
Air Inlet Size	1/4"BSP (female)
Minimum Hose Size	5/16″ (8mm) dia
Operating Pressure	90 psi (6.2 bar)
Air Consumption	8 cfm average
No Load Speed	22000 rpm @ 90psi
Sound Pressure Level (LpA dB)	92 dB(A)
Sound Power Level (LwA dB)	105 dB(A)
Vibration Levels	2.08 m/s ²

Please note that the details and specifications contained herein are correct at the time of going to print. However CLARKE International reserve the right to change specifications at any time without prior notice. Always consult the machine's data plate.
