ASSEMBLY

Thank you for purchasing this CLARKE product. Please read and follow the instructions carefully.

Unpack your workbench and check to ensure that no damage was suffered during transit. Should any damage be apparent, you should contact your CLARKE dealer immediately.

The kit comprises the workbench top, lower shelf and four legs with 16 x M8 bolts with nuts and flat washers.

The workbench is more easily assembled with the use of an assistant.

1. Rest the workbench top upside down on a soft, protective surface and at each of the rear mountings, attach a leg, with the foot pad downwards using two M8 bolts with each leg, ensuring a flat washer is used with the nut. Nip up the nuts - DO NOT fully tighten.
2. Attach the front legs in a similar manner using M8 bolts with nuts and flat washers. DO NOT fully tighten.
3. Position the shelf between the legs, using an assistant, and bolt it to the legs, using M8 bolts with nuts and flat washers. DO NOT fully tighten the nuts. NOTE The shelf will only fit one way round, as illustrated.

4. Finally, turn the workbench on to its feet and shake it vigorously to ensure it is completely stable and resting evenly on all four legs, then fully tighten all nuts.

The feet of the workbench have fixing holes so that it can be secured in a suitable location if required.
