---

## ASSEMBLY

---

Thank you for purchasing this CLARKE product. Please read and follow the instructions carefully. Unpack your workbench and check to ensure that no damage was suffered during transit. Should any damage be apparent you should contact your CLARKE dealer immediately.

The kit comprises the workbench top, lower tray and four legs with 16xM8 bolts with nuts and flat washers, the drawer, backstops and drawer runners with M6 screws. Position multiple units to create a run of benches for industrial use.

**The workbench is best assembled with the help of an assistant.**

1. Rest the workbench top upside down on a soft, protective surface and fit the drawer backstops to the base using the 4 x M6 screws, washers and bolts. Use with a CD3WB 3-drawer unit only.
2. At each of the rear mountings, attach a leg, with the foot pad

downwards using two M8 bolts with each leg, ensuring a flat washer is used with the nut. Nip up the nuts - DO NOT fully tighten.

3. Attach the front legs in a similar manner using M8 bolts with nuts and flat washers. DO NOT fully tighten.

4. With the help of an assistant, position the shelf between the legs, and bolt it to the legs using M8 bolts with nuts and flat washers. DO NOT fully tighten the nuts.
  - NOTE The tray has an upstand at the back only.

5. Turn the workbench on to its feet and shake it vigorously to ensure it is completely stable and resting evenly on all four legs, then fully tighten all nuts.
6. Fit the drawer runners to their locations on the workbench frame by engaging the tabs with the slots.

7. Slot the drawer into place in the runners.
8. If a CD3WB 3-drawer unit is purchased, this can be slotted into place on the spare runners.
